

User stories

Guest

- US-01: As a guest, I want to register with email and password so I can create an account.
- US-02: As a guest, I want to log in with my credentials so I can access my account.

Registered User

- US-03: As a user, I want to update my display name so my profile reflects my identity.
- US-04: As a user, I want to change my password so I can keep my account secure.
- US-05: As a user, I want to create a new profile so household members can have separate profiles.
- US-06: As a user, I want to switch between profiles so I can use the right profile each session.
- US-07: As a user, I want to delete a profile so I can remove ones no longer needed.
- US-08: As a user, I want to browse videos by category so I can discover content.
- US-09: As a user, I want to search for a video by title so I can find specific content.
- US-10: As a user, I want to play a video so I can watch content.
- US-11: As a user, I want to pause and resume a video so I can watch at my own pace.
- US-12: As a user, I want to select video quality so I can match my connection speed.
- US-13: As a user, I want to write a review for a video so I can share my opinion.
- US-14: As a user, I want to post a comment on a video so I can join the discussion.
- US-15: As a user, I want to rate a video with stars so I can express how much I liked it.
- US-16: As a user, I want to read other users' reviews so I can decide whether to watch.
- US-17: As a user, I want to view my watch history so I can find videos I've already seen.
- US-18: As a user, I want to remove an item from watch history so I can keep it tidy.
- US-19: As a user, I want to see personalised recommendations on my home page so I can find videos I'll enjoy.
- US-20: As a user, I want to log out so I can end my session securely.

Administrator

- US-21: As an admin, I want to add a new video with title and description so users can watch it.

- US-22: As an admin, I want to edit a video's metadata so information stays accurate.
- US-23: As an admin, I want to delete a video so outdated content is removed.
- US-24: As an admin, I want to assign a genre to a video so users can filter by genre.
- US-25: As an admin, I want to create a new genre so new content types can be catalogued.
- US-26: As an admin, I want to delete a genre so the genre list stays clean.
- US-27: As an admin, I want to create a new category so content can be better organised.
- US-28: As an admin, I want to delete a category so unused categories are removed.
- US-29: As an admin, I want to deactivate a user account so policy violations can be enforced.
- US-30: As an admin, I want to remove a review or comment so inappropriate content is moderated.

US-02 — Log in with credentials

As a guest, I want to log in with my credentials so I can access my account.

AC-1: Given I am on the login page, when I enter a valid registered email and correct password and click Log in, then I am redirected to my home page and my session is active.

AC-2: Given I am on the login page, when I enter an unregistered email or incorrect password, then an error message is displayed saying "Invalid email or password" and I remain on the login page.

AC-3: Given I am on the login page, when I leave the email or password field empty and click Log in, then a validation message is shown prompting me to fill in the required fields.

AC-4: Given I have successfully logged in, when I close and reopen the browser within the session timeout period, then I remain logged in without being asked to re-enter my credentials.

US-10 — Play a video

As a user, I want to play a video so I can watch content.

AC-1: Given I am logged in and on a video page, when I click the Play button, then the video begins playing within 3 seconds with no buffering on a stable connection.

AC-2: Given a video is playing, when the video reaches the end, then playback stops and a "Watch again" option is displayed.

AC-3: Given I am logged in and play a video, when playback starts, then the video is automatically added to my watch history.

AC-4: Given I am on a video page, when my internet connection is lost during playback, then a buffering indicator is shown and playback resumes automatically once the connection is restored.

AC-5: Given I am on a video page, when the video fails to load, then an error message is displayed and a "Try again" button is shown.

US-19 — See personalised recommendations

As a user, I want to see personalised recommendations on my home page so I can find videos I'll enjoy.

AC-1: Given I am logged in and have a watch history, when I visit the home page, then a "Recommended for you" section is displayed showing at least 5 video suggestions.

AC-2: Given I am logged in, when recommendations are displayed, then each recommended video reflects my watch history, ratings, or reviews and is not a video I have already watched.

AC-3: Given I am a newly registered user with no watch history, when I visit the home page, then a default set of trending or top-rated videos is shown in place of personalised recommendations.

AC-4: Given I am logged in and I rate or review a video, when I return to the home page, then the recommendations are updated to reflect my latest interaction.

AC-5: Given I am logged in, when I click on a recommended video, then I am taken to that video's page and can begin playback.

Main Scenarios for the selected user stories:

US-02 — Log in with credentials

As a guest, I want to log in with my credentials so I can access my account.

1. The guest navigates to the streaming platform's login page.
2. The system displays the login form with an email field, a password field, and a Log In button.
3. The guest enters their registered email address into the email field.
4. The guest enters their correct password into the password field.
5. The guest clicks the Log In button.
6. The system validates the submitted credentials against the registered account records.
7. The system confirms the credentials are valid and the account is active.
8. The system creates an authenticated session for the user.

9. The system redirects the user to their personalised home page.
10. The home page loads displaying the user's recommended content and navigation options.

US-10 — Play a video

As a user, I want to play a video so I can watch content.

1. The user is logged in and browses or searches for a video on the platform.
2. The user selects a video by clicking on its thumbnail or title.
3. The system loads the video detail page displaying the title, description, and video player.
4. The user clicks the Play button on the video player.
5. The system authenticates the user's access rights to the selected video.
6. The system retrieves and loads the video stream from the content server.
7. The video begins playing in the player at the default quality setting.
8. The system records the video as started in the user's watch history.
9. The user watches the video through to completion.
10. The system marks the video as watched in the user's watch history.
11. The player displays a "Watch again" option and a list of related videos.

US-19 — See personalised recommendations

As a user, I want to see personalised recommendations on my home page so I can find videos I'll enjoy.

1. The user is logged in and navigates to the platform's home page.
2. The system retrieves the user's watch history, ratings, and reviews from the database.
3. The system sends the collected user data to the ML recommendation engine.
4. The ML engine analyses the user's viewing behaviour and preferences.
5. The ML engine generates a ranked list of personalised video recommendations.

6. The system filters out videos the user has already watched.
7. The system retrieves the metadata (title, thumbnail, genre) for each recommended video.
8. The system displays the "Recommended for you" section on the home page with at least 5 video cards.
9. The user browses the recommendations displayed on the home page.
10. The user clicks on a recommended video card.
11. The system navigates the user to that video's detail page, ready for playback.
